

Product Revision Notice: Plastic Case LED driver Label Sticker Revision

2018/01/25

To promote the automation production and solve the problem of ink decaying after long time outdoor usage, MEAN WELL plastic case LED driver label sticker will be changed into laser engraving printing method. After long time testing under outdoor condition and actual product verification for LPV-20 and LPC-20 since 2016 Q2, laser engraving printing method for plastic case LED driver label sticker has been widely appreciated.

Since 2017, as the setting up of automation production lines of Huadu factory and to improve the production efficiency, LED plastic case models have gradually adopted laser engraving printing method, which has better weathering ability and less effect by the

For the revision this time, MEAN WELL has finished updating certificate. Electrical specifications and safety regulations will not be influenced. Furthermore, MEAN WELL fully bears any relevant cost, making no adjustment on the pricing. Should there be any questions, please refer to the updated specification on website or contact MEAN WELL sales representatives.

一、Revised Date : Since Feb.2018 (Production lot. : W1802C)
