Founded in 2001, Feiert Technology Co., Ltd has been committed to providing professional luminaires and lighting solutions for 19 years. The product range includes high bay lights, flood lights, street lights, stadium lighting and others that meet all customers' needs. In 2009, FEIERT used 500 units of MEANWELL's drivers to solve its high bay lights emergency in Japan, and after 10 years, the luminaires are still in operation. Since then, it has opened the door to long-term cooperation between FEIERT and MEAN WELL.

Mr. Shen, the President of FEIERT, who has visited MEAN WELL, stressed that MEAN WELL Company is a fairly pragmatic power company just like its brand image. Therefore, from the beginning of the cooperation, FEIERT posted the trademark of MEAN WELL on its posters to prove its high quality and reliability. This year is the 10<sup>th</sup> year since the cooperation from 2009. FEIERT will continue to cooperate with MEAN WELL creating a more energy-saving and high-quality lighting environment for the public.
