13 Level Remains: Reenactment of The Golden Age of The Mining Industry in Taiwan

Date: Mar. 20th 2020

By: Marketing Center

Nicole@meanwell.com

Formerly known as the "Shui Nan Dong Copper Smelter", it was a structure left over from the era of the Japanese occupation. Along the mountain from the top to the bottom, the building was set up as 13 levels high. Therefore, the most common name in Taiwan is "13 Level Remains", and some tourists also call it the "Sky City" or the "Potala Palace of Mountain Mines".

The site ceased production in 1981, and until the end of 2019, the vitality of the building was rekindled with gold lighting. Do you want to know the force behind the 13 Level Remains? Please click on the picture below, and then you will find the answer.
