

Product Revision Notice:OWA/NPF/PWM Series &LPV/LPC/ LPVL-150 Series Case Revision

At present, there are two types of mounting holes, O-shape and U-shape. However, for wider application installation demands and shell integration, the mounting holes shape of OWA / NPF / PWM series & LPV /LPC/LPVL-150 series are changed to U-shaped.

Product revision for this time is to modify the appearance of the cabinet mounting holes, having no influence on the product installation size, safety and other performance. MEAN WELL takes in all relevant additional cost, making no adjustment on the price. Please refer to the following illustration for detailed revision. Shall there be any questions, please contact MEAN WELL sales representatives.
